

**BULLETIN OF TOKYO METROPOLITAN
INDUSTRIAL TECHNOLOGY RESEARCH INSTITUTE**

NO.10 2015

Papers

- Development of low power consumption, low cost, and high durability micro heater
Hidehiko Yamaoka 2
- Evaluation of electrical properties of dielectric and semiconductor materials using continuous-wave terahertz radiation
Kouichi Tokita, Yuichi Ota 6
- Effects of porosity on impact properties of AD12 alloy castings
Shinji Nishimura, Kenji Sato 10
- Development of new LED luminaire improved color appearance No.2
Toshihide Iwanaga, Hiroataka Nakamura, Shirou Shirai, Shigeru Ichihara, Masami Ishihara 14
- Acting mechanisms of citric acid on the properties of nickel citrate electroplated film
Tadashi Doi 18
- Development of boron free nickel electroplating for electronic components
Kaori Urasaki, Shota Takemura, Satoshi Kuwahara, Tadashi Doi 22
- Evaluation of counter-activity to eliminate superoxide anion and OH radical using ESR combined with radiolysis
Seiko Nakagawa, Masayuki Sekiguchi 26
- Development of separated culture system for iPS cells and feeder cells using a protein-permeable collagen gel membrane
Yoshimi Ohyabu, Shunji Yunoki 30
- Potential for improved tribological property by surface texturing control of hydrogenated DLC film using MSE processing
Yuuki Tokuta, Masahiro Kawaguchi, Hideo Hayashi, Sadayuki Watanabe, Shinya Sasaki 34

Development of metrics for quality evaluation of information retrieval systems for incomplete evaluation data set	Norihiro Ohira, Shinichi Tomiyama	38
Development of level difference clearing caster	Yasuhiro Nishikawa, Yuya Suzuki	42
Verification of noise suppressing performance calculation technique for conduction interference suppression parts	Hiroyuki Ohashi, Yuta Watanabe, Manabu Omori	46
Design of dynamic vibration absorbers using a 3D printer	Yusuke Iwata, Yasuhiro Nishikawa, Yujiro Abo	50
Proposal of GHz band EMI measurement without electromagnetic wave absorber	Hidekatsu Sasaki, Fumio Takahashi	54
Notes		
High Power Impulse Magnetron Sputtering (HiPIMS) method — Its properties and applications of coating technology —	Tomotaro Watanabe, Tetsuhide Shimizu, Yoshikazu Teranishi, Hiroshi Nagasaka	62
Research and development of somersaulting balloon robot	Yusuke Kobayashi, Akinori Sasaki, Toshiki Masuda, Yusuke Morita, Kazuhiro Sakashita, Yukio Yokoyama	64
Development of the heatsink geometry improving heat transfer	Shinichi Tomiyama, Norihiro Ohira	66
Development of high-precision delay detector for anti-counterfeit	Tadashi Okabe, Takumi Shimizu, Yuji Takeda, Kohei Fujiwara, Takeshi Kobayashi	68
Impurity doping effect on wide band gap semiconductor boron nitride	Yuichi Ota, Koichi Tokita, Hiroto Watanabe	70
Angle dependence evaluation of infrared spectral emissivity for high-emissivity materials	Toshiharu Nakajima, Kazutaka Isoda	72

Evaluation of sound intensity measurement with particle velocity sensor probe	Keiko Nishizawa, Koichi Kanda	74
Evaluation of mechanical property of HIPIMS deposition assuming metal die application	Yoshikazu Teranishi, Kondou Yuriko, Hiroshi Nagasaka, Tomotaro Watanabe Kazuo Morikawa, Tetsuhide Shimizu	76
Application of chromium oxides prepared in super-micro porous silica matrix for environmental control technologies	Shoichi Somekawa, Hiroto Watanabe, Yuya Oaki, Hiroaki Imai	78
Dispersion and characterization of graphene particles in water	Shohan Yanagi, Takahiko Uematsu	80
Mechanical properties of mica filled polyolefin composites	Toshiyuki Yamanaka, Yosuke Nishitani, Tsubasa Shimizu, Takeshi Yasuda, Akihiko Ujiie, Eiichi Takahashi, Tetsuto Kajiyama, Kenichi Shimizu	82
Optical transparency of silica / polystyrene composite made by melt mixing	Takeshi Yasuda, Toshiyuki Yamanaka	84
Reduction of sludge generated from the manufacturing process of glass cullet by wet classification	Mami Tanaka, Ryoji Nakazawa, Naori Sasaki, Hiroki Kobayashi	86
Improvement of forced fish scale test method for vitreous enamel	Toru Yoshino, Kazuhiro Ookubo, Masashi Sasaki, Shigeyuki Watanabe, Aya Shimizu, Kenji Sato	88
Improvement of water-flow strength of granulated and sintered body made from CRT panel glass and shell powders with increased density	Ryoji Nakazawa, Naori Sasaki, Mami Tanaka, Kosuke Sakamoto, Rie Matsu-ura, Aya Kanemaki, Harufumi Minami, Kazu-ichi Sakaguchi, Tomomi Takahashi, Fumio Yamazaki	90
Nanoparticle dispersion technology using in-liquid plasma	Masahiro Kawaguchi, Hideo Hayashi, Sadayuki Watanabe	92

Influence of the carbon coating on thermal diffusivity measurement using xenon flash analyzer Haruhiko Numajiri, Masashi Sasaki, Kousuke Kuramochi, Kazuhiro Ookubo	94
Experiments on the influence of machine rigidity on impact property evaluation test Kenichiro Sakuraba, Doppo Matsubara, Yuya Suzuki	96
Effect of bolt pilot hole diameter on embedment strength of wood Doppo Matsubara, Takahiro Nakano, Masahiro Shimada	98
Development of electrostatic actuator having a displacement of 1mm Takashi Hasegawa, Yasuo Tonoya	100
A study on measuring method for shouldering pressure Hiroko Sugatani, Kenji Iwasaki, Yuji Takeda	102
Development of smartphone-linked devices using wearable Linux server Ryuta Atohama	104
Development of collecting/recovering technology for waste VOC from coating factories Shigenobu Shimada, Akio Urata, Akiyoshi Onozawa, Toshio Kinoshita, Akinori Sasaki	106
Adsorption properties of modified banana fiber with schiff bases to transition metal ions Tetsuto Kajiyama, Jun Inoue	108
Development of optical coherence tomography Masashi Nakamura, Hiroyasu Sano, Ken Satoh, Seirou Okaneya	110
Development of coolant base material using silica Taiki Tobusawa, Kenichi Shimizu, Rumi Konuma, Akihiro Hirayama, Hiroko Sugatani, Toshio Honda, Masami Watanabe	112
Evaluation of detecting material degradation by accelerated weathering test and luminescence measurement Hirokazu Sugimori	114

Abstracts other published papers and presented at society meeting	
Papers	119
Presentations	125
Poster	135
Review	142
