## Tokyo Metropolitan Industrial Technology Research Institute Structure

|                                      |   |  | As of April 2023   |
|--------------------------------------|---|--|--|
| Internal Audit<br>Department         |   | Internal Audit Office                                  | Internal Audit   |
| DX Promotion<br>Department           |   | DX Promotion Office                                    | DX Promotion Planning / Information Infrastructure   |
| Management<br>Planning<br>Department |   | Management Planning Office                             | Planning and Coordination / Public Relations / Library   |
|                                      |   | Research Planning Office                               | Research Management / External Funding / Intellectual Property   |
|                                      |   | Project Planning Office                                | Project Planning / Project Accounting  |
|                                      |   | Collaboration Planning<br>Office                       | Industrial Exchanges / Technology Assessment   |
|                                      |   | Bangkok Branch   | Technical Support for Japanese-affiliated Companies in the Southeast Asian Region Centered on Thailand   |
| General Affairs<br>Department        |   | General Affairs Division                               | General Affairs / Personnel and Salary   |
|                                      |   | Financial Accounting Division                          | Accounting / Treasurer   |
|                                      |   | Environmental and<br>Safety Management Office          | Facilities / Safety Management   |
| ch and Development Department        | Physics Applications<br>Division                                    | Electrical Technology                                  |  |
|                                      |   | Group<br>Mechanical Technology                         | Electrical Applications / High Voltage Evaluation / MEMS<br>Mechanical Systems / Thermal Energy Processing / Metal Working /                       |
|                                      |   | Group  | Additive Manufacturing   |
|                                      |   | Optics and Acoustics<br>Technologies Group             | Acoustic Technology / Radiation Characteristics of Light Souce and Lighting  |
|                                      | Functional Chemical<br>Materials Division                           | Materials Technology Group                             | Polymer Materials / Catalyst Materials / Optical Materials and Devices /<br>Materials Synthesis and Characterization                               |
|                                      |   | Industrial Process<br>Technology Group                 | Surface Characteristics and Tribology / Environmental Impact Control /<br>Surface Treatment  |
|                                      |   | Biotechnology Group                                    | Healthcare Industry Support [SUSCARE®] / Application of Microorganisms   |
| Researc                              | Information Systems<br>Technology Division<br>(DX Promotion Center) | IoT Technology Group                                   | IoT Solution / IoT System Introduction Support   |
|                                      |   | Robotics Technology Group                              | Mechanical Safety / Application  |
|                                      |   | Communication<br>Technology Group                      | Information and Telecommunications / Radio Frequency   |
| Technology Support Department        | Technology Support<br>Division                                      | Technology Promotion                                   | Consultation / Technical Seminars / Support Lab for New Product Development /<br>Metropolitan Technical Support Network for Export Products [MTEP] |
|                                      |   | Engineering Validation<br>Technology Group             | Environmental Test / Electricity and Temperature Test /<br>Strength Test of Products and Materials / Precision Geometric Measurement               |
|                                      |   | Industrial Analysis and<br>Inspection Technology Group | Materials Analysis / Radiation Applications  |
|                                      | Regional Technology<br>Support Division                             | Joto Branch  | Design Support / Product Design / Manufacturing Support<br>(Joto Branch is temporarily closed for renovation.)                                     |
|                                      |   | Sumida Branch  | Materials' Comfortability Measurement / Sensory Characteristics Measurement /<br>Kinesiological and Anthropometric Measurement                     |
|                                      |   | Jonan Branch   | Instrumental Analysis and Environmental Testing / Precision Measurement /<br>Prototyping and Processing  |
|                                      |   | Food Technology<br>Research Center                     | Food Products Technology   |
|                                      | Tama Techno Plaza   | General Support Section                                | Cooperation Support / Public Relations   |
|                                      |   | Electronics Technology<br>Group                        | Mobility EMC / Electronics Applications  |
|                                      |   | Composite Materials<br>Technology Group                | Fiber Reinforced Composite Materials / Functional Processing /<br>Materials Evaluation and Measurement   |
